Home Lawn Care Program

- 1. Early Spring: Pre-Emergent Crabgrass Prevention**
12-0-0 25% Slow Release
Combo fertilizer with excellent control of crabgrass, pot annual, and other grassy weeds.
1 bag covers up to 10,000ft² (1/4 acre)
Tip: Must water in after application to form barrier.
- 2. Spring: Weed & Feed**
17-0-4 30% Slow Release
Premium weed and feed that controls a broad spectrum of weeds. Best choice to control clover.
May need two applications 30 days apart for best control.
1 bag covers up to 10,000ft² (1/4 acre)
Tip: Must wet lawn prior to application so flakes stick to leaves.
- 3. Summer: Fertilizer / Insect Control**
16-0-2 Feeding/Insect Control/Green Up
Controls grubs and other soil borne insects that feed on the roots of turf grass.
1 bag covers up to 10,000ft² (1/4 acre)
Tip: Do not apply during excessive heat. Water in after application.
- 4. Early Fall: Fertilizer**
17-0-5 Iron Feeding/Green Up
Contains iron to help summer stressed lawns recover and green up
1 bags covers up to 10,000ft² (1/4 acre)
Tip: Water in after application
Sub with Weed & Feed if needed (follow above tip)
- 5. Late Fall: Fertilizer**
20-0-10 100% Slow Release
Premium fertilizer that provides necessary nitrogen in late fall for a more vigorous and healthy lawn in the spring.
1 bag covers up to 10,000ft² (1/4 acre)
Tip: Water in after application

Optional Late Fall: Dolomitic Lime

Raise pH
2bags per 1/4 acre

Tip: Water in after application
